Hi Mark,

Blair is out today so I'm responding. Is this related to a specific site? I'm thinking Cove? If it's covered by our technical direction for Cove, the best thing that could happen is that Freya gives us an email telling us it's covered and to move forward. But we still need to see if John is available for Thursday (I will send him a text and check). If it's separate work outside of Cove, we'd need a new technical directive.

Krissy

Subject: Help from John for a day at Quivira

Hi Blair, Secody is out on emergency travel to help R8 with outreach on Navajo for the Gold King mine spill.

Could I ask John to contact Edison and then to spend one day at the site on Thursday?
